

Being a teacher is a great job because many students go through teachers. They devote their time and energy to teaching us how to count and write.

So, who is a teacher? A teacher is the one who gives knowledge to people, this is not just a profession, teachers open the world to us in knowledge, develop our horizons.

A teacher is the person who goes through all the difficulties with you, meets you at the threshold of the school, and is next to you from start to finish. At times, teachers can replace our parents.

I believe that the teaching profession will live forever, as it will be in demand in the future. The main thing is to appreciate and do not forget your teachers.
